ENTIRELY FROM XTREME CUBES.

WELCOME TO XTREME CUBE™

A division of **Xtreme Manufacturing™**, **Xtreme Cube™** produces portable, durable and highly customizable structures that can be utilized in almost any application.

WHAT IS AN XTREME CUBE?

The Xtreme Cube modular building system begins with a structural steel space frame that is available in 8ft, 10ft and 12 ft widths and lengths, where a height of 10ft is standard, but optional 12ft height is available. Xtreme Cube structures are multi-story capable and available in lengths up to 60ft.

The space frame can be customized to the client's exact requirements, including walls, doors, windows, electrical, HVAC, plumbing, data, décor and furnishings, and are delivered turnkey with plug and play connections.

All Xtreme Cubes have a versatile corner design for easy pick up, connections and anchoring on-site. They also feature forklift pockets for ease of moving and transporting.

The welded steel structure and high quality components permit an unlimited number of mobilizations and a long usable life.

8' W x 8' L

10' W x 10' L

12' W x 12' L

XTREME CUBE™

PRE-CONSTRUCTION

Xtreme Cube™ structures are easily transported and can be reconfigured into unlimited configurations that offer construction contractors a long-term, yet highly flexible solution for pre-construction job site facilities. Structures range from security gatehouses, to training facilities, office complexes, tool rooms and on-site maintenance workshops.

INDUSTRIAL

Xtreme Cubes provide the ideal solution to creating workspaces in urban and remote industrial environments, including those with hazardous or blast conditions. All cubes are engineered for your location (wind, snow and seismic).

FACILITIES INCLUDE: OFFICES

Flexibility to work from anywhere, office cubes are climate controlled and can be equipped with a convenient on-site restroom.

BREAK ROOMS & LOCKER ROOMS

TOOL/HOSE ROOM

LUBE CUBE & HAZMAT STORAGE

MAINTENANCE FACILITIES & WORKSHOPS
